Mississippi												
(Trans American Waste) Central Landfill 8680 Highway 11 North, McNeill, MS 39457	Subtitle D Landfill		Subtitle D Compliant Municipal, Solid Waste Landfill, MDEQ Solid Waste Permit # SW0550010469 Permitted to accept MSW, C&D and non-hazardous industrial/special waste. Original Permit Issuance: January 26, 1999; Current Permit Issuance: April 14, 2009; Expiration: 03/31/2019 (Note: There is an older landfill several hundred feet away from the current landfill. This landfill was permitted by the previous owner Central Landfill, Inc. on May 12, 1987 and was purchased by Waste Management. The old landfill has been covered and closed now for more than a decade.)	The landfill has the standard Subtitle D composite liner system consisting of two feet of recompacted clay overlain by an HDPE component.	The landfill is currently recirculating its leachate. However, in the event of problems or for excess leachate, the landfill transports its leachate out of state. Since an out-of-state facility does not require a pre-treatment permit from MDEQ, we do not have information readily available indicating where the leachate is being transported. The landfill has an ongoing approved groundwater monitoring program and groundwater monitoring well system around the perimeter of the landfill that is sampled twice annually and the results reported to MDEQ. The landfill is not under any type of assessment monitoring program.		10,890,014 cu yd (as of December 31, 2009)	Some routine inspection items noted. No outstanding enforcement issues.	no	Justin Page, Landfill Mgr. – 601-795-2500	BP Waste Mgmt Plan 5/7/10;Appendix A WM Services Gulf Coast Area Disposal Sites; Region 4 Spreadsheet sent 05/11/10	owned and operated by TransAmerican Waste Central a subsidiary of Miss, Inc.;
Pecan Grove Landfill 9685 Firetower Road, Pass Christian, MS 39571	Subtitle D Landfill		Subtitle D Compliant Municipal, Solid Waste Landfill, MDEQ Solid Waste Permit # SW02401A0400176; Permitted to accept MSW, C&D and non-hazardous industrial/special waste Original Permit Issuance: July 14, 1987 Current Permit Issuance: November 27, 2001 Expiration: November 27, 2011.	The landfill has the standard Subtitle D composite liner system consisting of two feet of recompacted clay overlain by an HDPE synthetic component.	The leachate from Pecan Grove Landfill is being transported to two local POTW plants: the City of Gulfport North Plant (Mississippi Pretreatment Permit #WWTP MS0051756) and to the City of Gulfport South Plant (Mississippi Pretreatment Permit # WWTP MS0023345). This landfill has also been approved to conduct some demonstration efforts of leachate recirculation activities. The landfill has an ongoing approved groundwater monitoring program and groundwater monitoring well system around the perimeter of the landfill that is sampled twice annually and the results reported to MDEQ. The landfill is not under any type of assessment monitoring program.		10,402,981 cu yd (as of December 31, 2009)	no outstanding enforcement issues.	no	Sam Williams, Landfill Mgr: 228-255-5553	BP Waste Mgmt Plan 5/7/10; Appendix A WM Services Gulf Coast Area Disposal Sites; Region 4 Spreadsheet sent 05/11/10	owned and operated by Waste Management of Miss, Inc. - Approved Service Area: 100 mile radius of Harrison County, Mississippi - excluding the City of New Orleans
